## **DETAILED ACTION**

1. Claims 1-56 are pending.

## Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1, 2-13, 19, and 56 are drawn to content protection and/or unauthorized use of data/content by authorizing content, classified in class 726, and subclass 30.
- II. Claims 14 and 15 are drawn to content protection and/or unauthorized use of content by access control, classified in class 726, and subclass 27.
- III. Claim 16 is drawn to authenticating/verifying based on predefined usage, classified in class 380, and subclass 232.
- IV. Claim 17 is drawn to virus/threat detection on content, classified in class 726 subclass 24.
- V. Claim 18 is drawn to usage determination, classified in class 380 and subclass231.
- VI. Claims 20-47 and 50 are drawn to including key on the record/content for encryption/decryption/cryptography, classified in class 380, and subclass 228.
- VII. Claims 48, 49 and 53 are drawn to prevention of unauthorized use of data/content by authorized user, classified in class 726 and subclass 28.

Art Unit: 2136

- VIII. Claim 51 is drawn to content copy detection, classified in class 726 and subclass 32.
- IX. Claims 52, 54, and 55 are drawn to content data masking/hiding, classified in class 380 subclass 205 and/or class 380 and subclass 201.
- 3. Inventions I-IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, unauthorized use of content by authorizing content in subcombination I can be utilized in unauthorized use of content by access control in subcombination II is utilized in content protection, while authentication based on predefined usage in subcombination III can be utilized content protection by detecting virus/threat in subcombination IV is utilized in determination of content usage in subcombination V can be utilized in protecting content by including a license key for encryption/decryption in subcombination VI is utilized in prevention of unauthorized use of content by authorized user in subcombination VII can be utilized in copy detection and protection in subcombination VII is utilized in content protection cryptographically by masking content data. See MPEP 806.05(D).
- 3. Inventions I-IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 808.01).

Application/Control Number: 10/718,417 Page 4

Art Unit: 2136

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the election invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should the applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over prior art, the evidence or admission may be used in a rejection under 35 U.S.C 103(a) of the other invention.

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eleni A. Shiferaw whose telephone number is 571-272-3867. The examiner can normally be reached on Mon-Fri 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nasser R. Moazzami can be reached on (571) 272-4195. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
